## Spiritual Adoption Program

### Month 2: Developing Baby

Your baby is making progress developing all his external features and internal organs. His brain is functioning at 40 days. His mother can hear his heartbeat now on an ultrasonic stethoscope. Baby-teeth buds are present at six and a half weeks. From this moment, your spiritually adopted baby grows and refines his body. But everything he needs to survive after birth is already present by the end of the eighth week.

The word Advent originates from a Latin word “Adventus” which means “coming” or “arrival.” Advent Season is focused on preparing for the coming of Jesus Christ in all ways, from His birth in the past to His Second Coming in the future as the Messiah.

For us Catholics, Advent is a meaningful season that reminds us of the reality of Jesus Christ and that He has come and He is present in our world and lives. The birth of Jesus is worth celebrating because it reveals His human side and is therefore an example of how we should live our own lives as his followers here on earth.

Jesus’ ascent into heaven does not mean He has abandoned us. While awaiting His return, we can still experience His presence through the Holy Spirit, our spiritual family which is the church, the sacraments and His Word.

In the Second Coming, Jesus will appear in His full glory and it will perfect and complete our community and identity as His people. It is during this time that we can finally be united with Him and spend eternity with Him in heaven.

Advent acknowledges these two significant events in our lives as Christians. It is a time for us to look back to Christ’s birth and celebrate His second coming. In the period between these two important events, we are to discover and fulfill our God-given purpose.

**Humour:** Three engineers were in a car. There was an electrical engineer, a chemical engineer, and a computer engineer who worked for Microsoft. Suddenly, the car’s engine went dead and the driver was forced to pull off to the side of the road. The three engineers looked at each other, and wondered what could be wrong. The electrical engineer suggested they strip down the electronics of the car and try to trace where a fault might have occurred. The chemical engineer, not knowing much about cars, suggested that maybe the fuel was emulsified and it was getting blocked somewhere. Then, the Microsoft engineer came up with a suggestion: ‘If we close all the windows, get out, get back in, and then open the windows again, maybe it’ll work!’
